

CASA

Levels of ESC Support and Suggested Fee Structure

Pricing should be based on your daily rate for training. The training component of this tool is a full six-hour workshop.

We recommend another full day of working with district teams on the use of the protocol using student work collected from their campuses. Depending on the size of the district and their desire for support the number of days could be increased.

It is highly recommended that a formal meeting be held with the district prior to pricing to determine district needs in these areas.
